SUMMARY

I'm a Software Developer skilled in designing, developing, and testing software, with a focus on both frontend and backend technologies like Next.js, React.js, and Django. At SOOPER.AI, I've built multipage web applications and AI agents that significantly improved performance and user experience. I've also designed embedded software at EInfochips. I'm excited to bring my skills to a new team and help enhance user engagement while supporting the company's goals.

EXPERIENCE

Software Developer

Anvenssa AI

- 03/2024 Remote
- Developed AI agents, including RAG agents, query agents, and general-purpose agents, using Django and Node.js.
 - Optimized token consumption for the backend to enhance cost efficiency.

Full Stack Developer (Intern)

SOOPER.AI

- 09/2023 Remote
- Developed multipage web applications using Next.js and Tailwind CSS.
 - Optimized application performance to ensure faster load times, enhancing overall usability.

Associate Engineer (Intern)

EInfochipsEInfochips (An Arrow Company)

- 01/2023 Ahmedabad
- Einfochips is a product engineering and semiconductor design services firm, specializing in digital transformation and connected IoT
- Designing and implementing software of embedded devices and systems.
 - Designing, developing, coding, testing and debugging system software.

EDUCATION

Electronics & Communication Engineering

Swami Keshvanand Institute of Technology Management G Gramothan (SKIT)

2023
